

You're invited to attend

A half-day professional development experience **focused on implementing middle school career exploration** and designed *exclusively* for Yavapai County educators.

School teams are encouraged to attend together!

PD: EXPLORE MORE!

Together we can inspire and empower students and grow Yavapai County's future.

At a glance:

- We'll dig into the why, what and how of middle grades career exploration and pathway planning.
- You'll come away with engaging, adaptable, no-cost resources you can use right away. (See below.)
- We'll wrap up with practical tools for determining your next steps.

Bring a laptop and join session leaders in actively exploring:

- **MyFutureAZ.com:** An interactive career exploration and pathway planning platform with components specifically for middle schoolers.
- **Possible Futures Curriculum:** Spotlight on two key modules. **Skills for Success** helps students build essential communication, collaboration, and growth mindset skills through interactive activities and real-world reflection. **Lenses on the Future** guides students in learning more about their interests and strengths, explore how they can use those to contribute to society, and chart a path to future career success.

Friday, May 1, 2026
