School Safety Planning Tabletop

Instructions:

Participants are invited to use this document to take notes during the panel presentation. During the tabletop exercise, discuss the following questions with others at your table. You may use this document to begin the process to assess the strengths and areas needed for improvement in your school/district.

What are the physical and psychological safety priorities for your district/school?

What are the risks if these priorities are not met?

What steps are needed to establish/improve a comprehensive approach?

Do we have the right people in place?

What resources are needed to address your priorities?

Review the table below. Are these elements in place in your district/school? What areas need improvement? Who will assist you to review the checklist?

What are your next steps to develop/improve your district/school safety planning and crisis response?
