

The Career Exploration Campus Initiative

DRAFT

Creating thriving futures for Arizona's youth and meeting Arizona's workforce and civic needs are at the heart of the Career Exploration Campus Initiative. Data shows that learning environments that engage, inspire and prepare students with the knowledge, experiences, competencies and supports needed to make them - and Arizona - future-ready are essential for the success of our students and state. This Initiative, co-created by Arizona business, community and education partners and facilitated by ABEC, will seed transformation of Arizona's P-12 classrooms with career and future-readiness at its core, resulting in a model that will provide schools and school systems that adopt it with a roadmap for systemically integrating essential elements of career exploration and development through every student's educational journey in ways appropriate for each age and stage. For those implementing the model with fidelity and rigor, an Arizona Career Exploration Campus designation or seal will be awarded to denote this exceptional community asset.

Future-Ready skills are the foundation of the Career Exploration Campus and are practiced in everyday learning
